Berberis Mentorensis

(U. S. Plant Patent 99)

Stays green practically the entire year

A remarkably fine hedge plant that withstands heat and drought.

Berberis Mentorensis is the result of a cross between Barberry Thunbergi and Barberry Juliana. It has very rugged, strong, upright growing branches and quite formidable thorns. Its foliage is heavy and thick, and of perfect color—a green as dark as the Japanese Yew.

Its most valuable attribute is its ability to withstand heat and drought. Few other shrubs or hedge plants are able to go without water and withstand intense heat as Barberry Mentorensis and look as well. During the hottest weather there is never any sign of wilting or burning, much to the amazement of everyone.

Upright growth; easy upkeep (requires really no pruning) and its tenacious foliage, more than compensates for the lack of berries. We heartily recommend Berberis Mentorensis to you and claim it to be the best moderately priced and perfectly hardy hedge plant to date.

ROSES

NOTE: We are now offering both western-grown and southern-grown roses. When ordering please state which you prefer. Prices published here are for southern roses—western roses will average about 2c per plant higher.

Rose growing is one of our specialties. We produce large quantities in wide assortment. With the exception of a few of the common climbers, all of our roses are low budded on multiflora japonica which is generally conceded to be the best all-around rose understock. The roots of this understock are fibrous and pliable and adaptable to most types of soil. Our method of propagating produces symmetrical well balanced plants with short shanks suitable either for pot or garden culture. All of our roses are graded carefully according to the standards of the American Association of Nurserymen.

Look over this list and note the fine assortment offered.

Prices quoted are for 2 year No. 1 grade. See the following schedule for prices of No. 1½ roses:

VINES (Continued)

GOLDFLAME HONEYSUCKLE

(Name trademarked)

The best everblooming vine. In bloom constantly from early summer until killing frost. Showy tubular flowers, with recurving petals; flame-red outside, bright yellow inside. Delightfully fragrant, especially after night-fall. Handsome blue-green foliage, almost evergreen. Extremely versatile: can be trimmed to make compact everblooming shrub or hedge; also useful as ground cover or for trellises, arbors, etc. Known to be hardy in all parts of the country.

One year old, field-grown
4.00 per 10; 35.00 per 100

ROSEGLO HONEYSUCKLE

(Name trademarked)

Similar to Goldflame but the flowers are pink outside and creamy-white inside. Used chiefly as an everblooming shrub.

One year old field-grown
4.00 per 10; 35.00 per 100

Attractive colorplates of these two Honeysuckles are available to our customers.

FRUIT TREE SEEDLINGS

For many years we have specialized in the production of Fruit Tree Seedlings both in the Kaw Valley of Kansas and in the Pacific Northwest. These two sections are recognized as the best locations in America for the production of fruit tree seedlings. Together they account for the major portion of all seedlings produced.
